Presentation Overview

Standard Text Frame

Block Title Example

This shows a standard block element for important content or definitions.

- Standard bullet points for main ideas
- Use **concept highlighting** for important terms
- Secondary level points:
 - Supporting details or explanations
 - Additional examples or evidence
- Use **highlight command** to emphasize key phrases

Important Note

Alert blocks can be used for critical information or warnings.

Two-Column Layout

Left Column

Use columns for comparing ideas or presenting related content side by side.

- Point 1
- Point 2
- Point 3

Right Column

The width of columns can be adjusted based on content needs.

- Item A
- Item B
- Item C

Text below columns spans the full width of the slide.

Tables and Figures

Category	Value 1	Value 2
Item A	42.5	18.3
Item B	37.8	24.6
Item C	25.3	31.2

Table: Example table with booktabs style

Charts and Diagrams

Code Examples

```
1  # Function example
2  def calculate_stats(data):
3      """Calculate basic statistics"""
4      results = {
5          'mean': sum(data) / len(data
6              ),
7          'max': max(data),
8          'min': min(data)
9      }
10     return results
11
12 # Example call
13 data = [12, 45, 33, 27, 19]
14 stats = calculate_stats(data)
15 print(f"Mean: {stats['mean']}")
```

Code can be displayed with:

- Syntax highlighting
- Line numbers
- Custom background
- Caption and title

Key Points

Keep code examples concise and focused on the important concepts.

Listing 1: Sample Python code

Mathematical Notation

Equation Example

The relationship between variables can be expressed as:

$$f(x) = \alpha \cdot x^2 + \beta \cdot x + \gamma \quad (1)$$

Where:

- α, β, γ are constants
- x is the independent variable

Inline math examples:

- The integral $\int_a^b f(x)dx$ represents area
- For any $n > 0$, we have $\sum_{i=1}^n i = \frac{n(n+1)}{2}$

Matrix notation:

$$A = \begin{bmatrix} a_{11} & a_{12} & a_{13} \\ a_{21} & a_{22} & a_{23} \\ a_{31} & a_{32} & a_{33} \end{bmatrix} \quad (2)$$

References and Citations

Selected References

Smith, J., and Johnson, A. (2023). Title of the paper. *Journal Name*, 12(3), 45-67.

Template Usage Notes

How to Use This Template

- Replace placeholder text with your content
- Update title page information
- Replace example images with your figures
- Adjust colors in the preamble if needed

Important Tips

- Keep slides concise (aim for 1 main idea per slide)
- Use consistent visual style throughout
- Test your presentation on the display you will use
- Consider creating a handout version
